

Making a dog tie out of a hoomans tie.

- 1) Measure your dog's neck and cut from the thin end of the tie to be the collar part. Leaving the wider end.

2)

- 3) Measure how long you want/need the actual "tie" part and cut accordingly. Sew the angles at the bottom of the tie. Loop the tie around the collar in the middle and sewed it to adhere - making sure the stitching does not show on the front. If you prefer not to hand sew just machine it to the centre of the neck/collar part of the tie.

Instead of velcro or clasps, you can use elastic. If your dog is really squirmy elastic makes it easy put on and take off. You can slip the 'tie' on and off your dog really quickly.
